## LYON'S LOOPS SOLUTION

---

---

1. See Figure 1 to identify parts. Hold puzzle by spirals, with TOP pointing up. Fold in half so that the legs are placed together. Puzzle will fold in either direction, but only one direction will place the legs together.

2. Slide the ring, one side at a time, up over the legs. Follow the channel through the interior of the puzzle, to the top of the spirals. See Figure 2.

3. Drop ring over TOP. Let go of ring, and forget about it for now. See Figure 3.

4. Holding puzzle by spirals again, open and fold in the opposite direction.

5. Bring ring back over TOP. Follow the spirals around to the back of the puzzle (where the legs are). Bring ring up through channel (as in step 2), and off TOP.

Figure 1

Figure 2

Figure 3

**REASSEMBLY:** Fold puzzle so that spirals are together. Drop ring over TOP. Bring ring down through channel, follow spirals around. Drop ring over TOP again. Fold puzzle in opposite direction. Bring ring back over TOP. Do NOT follow spirals again. Bring ring down through channel at back of puzzle. Ring will pass over legs and come to rest on the triangle.
